PROJECTS

State Audit Information System for the Ministry of Finance 2026

State Audit Information System centralizes audit processes within a unified platform, ensuring secure data storage, accelerating decision-making processes, and increasing the efficiency of public financial oversight.

National Accounting Program for the Ministry of Defense 2026

National Accounting Program-MN is an accounting software system used to record financial transactions, manage financial operations, and prepare reports. It is designed to collect and process financial data of enterprises and government institutions within a unified system.

Code Generator 2026

Code Generator is a tool that automatically creates source code using predefined rules and templates. It helps reduce repetitive coding, speeds up development, and decreases possible errors.

Handex.edu.az [↗](#) 2025

This platform was designed to digitize the modern education system. It is equipped with user-oriented modules, a flexible interface, and ready-to-use systems tailored to meet the needs of its users.
